Dear Sir or Madam,

FENESTRAN manufactures **windows and doors** in order to the ability to replicate any style. We specialize in the designing and manufacturing beautiful and durable:

- **Tilt & Turn Windows**
- **Alu Cladding Windows**
- **Sliding Sash Windows**
- **Casement Opening Outward Windows**
- **Entrance Doors**
- **Folding Door**
- **Sliding Doors**
- **Interior doors**

for Installers, Designers and Architects. We use only high quality and resistant materials and components to provide our customers high-class product with particular attention to details, to ensure we have a happy customer and lots of recommendations, each and every time. All windows are made of three planks, of Redwood or Hardwood, laminated together with the grains running in different directions. This means that if the timber wants to move or warp, it pulls against itself making for a much stronger and more stable timber window. Doing this we have solved the problems associated with traditional wooden windows.

Our service include preparing CAD technical drawings for all orders and on request. Our delivery time is between 5-8 weeks depending on what type of windows or doors are ordered. We are always flexible with new profiles or nonstandard projects. All our components are delivered by trusted and well known suppliers.

### **Additional offer:**

- Aluminium joinery
- Shutters
- Cills
- Flooring
- Stairs

### **TIMBER:**

All windows to be crafted from European Redwood from eastern Europe where the long harsh winters encourage slow growth of trees giving them a much tighter grain and a much harder more durable timber. We laminate three planks together with the grains running in different directions. This means that if the timber wants to move or warp it pulls against itself making for a much stronger and more stable timber window. Doing this we have solved the problems associated with traditional wooden windows.

### **Available timber:**

- Pine fingerjointed
- Pine laminated
- Meranti
- Oak
- Accoya + pine
- Accoya
- And many more.

### **FINISHING**

All of our timber windows and doors are completely factory finished before they leave our workshop. Firstly we pressure treat the timber frames and glazing beads against rot and fungus. Then we spray paint the windows with microporous paint. Making sure we paint the every part of the window that might be exposed to the elements. All RAL, NCS, Farrow and Ball paints available as we as 12 standard stain colors.

**We are using paint:**

- Remmers,
- SIGMA.

**GLAZING:**

All frames to be glazed with 24mm argon filled units with a warm edge spacer bar and soft coat glass. On average our windows achieve a U value of 1.1. Available colors of spacer bars: RAL 9016, RAL 9005, RAL 8003, RAL 8016, RAL 7035, RAL 7040.

**Glass supplier:**

- PILKINGTON

Our current offer is presented on webpages: **[www.fenestran.com](http://www.fenestran.com)**

Best regards,
